Office Action Summary

Application No.

09/576,022

Applicant(s)

Wallace et al.

Examiner

Temica M. Davis

Art Unit

2681

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on May 23, 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-28 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-28 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
*See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s). 4 6) ☐ Other:

Art Unit: 2681

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 5, 6, 8, 11-15, 18-21 and 24-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Berggren et al (Berggren), U.S. Patent No. 6,073,015.

Regarding claim 1, Berggren discloses a mobile activity status tracker (48 or 52), comprising: a database relating to individual wireless device subscribers (col. 7, lines 5-29, col. 8, lines 45-55); a communications channel to allow entry of data into said database via a

Art Unit: 2681

signaling transfer point (col. 8, lines 19-55); and a TCP/IP communications channel for communicating information contained in said database to an external entity over at least one of an Internet and an Intranet (col. 4, lines 46-56, col. 10, line 42-col. 11, line 1).

Regarding claim 2, Berggren discloses the mobile activity status tracker according to claim 1, wherein: said communications channel utilizes a TCP/IP communications protocol (col. 10, line 42-col. 11, line 1).

Regarding claim 5, Berggren discloses the mobile activity status tracker according to claim 1, wherein: said data entered into said database is previously forwarded by a Home Location Register (36) (col. 8, lines 19-55).

Regarding claim 6, Berggren discloses the mobile activity status tracker according to claim 5, wherein: said Home Location Register is a stand-alone Home 5 Location Register (figure 1).

Regarding claim 8, Berggren discloses the mobile activity status tracker the mobile activity status tracker according to claim 1, wherein: said mobile activity status tracker is external to a Home Location Register servicing said individual wireless device subscribers (figure 6).

Regarding claim 11, Berggren discloses the mobile activity status tracker according to claim 1, wherein: said mobile activity status tracker is adapted to compare a temporary record with entries in said database to determine any changes in activity status relating to a relevant wireless device and overwrite an existing record with said temporary record if a change in activity status is determined (col. 8, lines 45-55).

Art Unit: 2681

Regarding claim 12, Berggren discloses the mobile activity status tracker according to claim 11, wherein: said mobile activity status tracker is further adapted to forward relevant information relating to said determined changes in activity status to at least one relevant application server (col. 8, line 30-col. 9, line 9).

Regarding claim 13, Berggren discloses a method of providing ;z database of presence or location information regarding wireless system subscribers, comprising: forwarding a registration notification message from a Home Location Register to a mobile activity status tracker (col. 8, lines 30-55); and transmitting at least one of presence and location information relating to at least one wireless system subscriber to an application server via at least one of an Internet and an Intranet (col. 10, line 42-col. 11, line 1).

Regarding claim 14, Berggren discloses the method of providing a database of presence and location information regarding wireless system subscribers according to claim 13, further comprising: comparing a temporary record with entries in said database to determine any changes in activity status relating to a relevant wireless device; and overwriting an existing record with said temporary record if a change in activity status is determined (col. 8, lines 45-55).

Regarding claim 15, Berggren discloses the method of providing a database of presence and location information regarding wireless system subscribers according to claim 14, wherein: said registration notification message is forwarded through a signaling transfer point between said Home Location Register and said mobile activity status tracker (col. 8, lines 19-55).

Art Unit: 2681

Regarding claim 18, Berggren discloses the method of providing a database of presence and location information regarding wireless system subscribers according to claim 14, wherein: said Home Location Register is a stand-alone Home Location Register (figure 1).

Regarding claim 19, Berggren discloses an apparatus for providing a database of presence and location information regarding wireless system subscribers, comprising: means for forwarding a registration notification message from a Home Location Register to a mobile activity status tracker (col. 8, lines 30-55); and means for transmitting at least one of presence and location information relating to at least one wireless system subscriber to an application server via at least one of an Internet and an Intranet (col. 10, line 42-col. 11, line 1).

Regarding claim 20, Berggren discloses the apparatus for providing a database of presence and location information regarding wireless system subscribers according to claim 19, further comprising: means for comparing a temporary record with entries in said database to determine any changes in activity status relating to a relevant wireless device; and means for overwriting an existing record with said temporary record if a change in activity status is determined (col. 8, lines 45-55).

Regarding claim 21, Berggren discloses the apparatus for providing a database of presence and location information regarding wireless system subscribers according to claim 20, wherein: said means for forwarding forwards said registration notification message through a signaling transfer point between said Home Location Register and said mobile activity status tracker (col. 8, lines 19-55).

Art Unit: 2681

Regarding claim 24, Berggren discloses the apparatus for providing a database of presence and location information regarding wireless system subscribers according to claim 20, wherein said Home Location Register is a stand-alone Home Location Register (figure 1).

Regarding claim 25, Berggren discloses an apparatus for providing a database of presence and location information regarding wireless system subscribers, comprising: means for copying and forwarding to a mobile activity status tracker a registration notification message sent to a Home Location Register (col. 8, lines 30-55); and means for transmitting at least one of presence and location information relating to at least one wireless system subscriber to an application server via at least one of an Internet and an Intranet (col. 10, line 42-col. 11, line 1).

Regarding claim 26, Berggren discloses the apparatus for providing a database of presence and location information regarding wireless system subscribers according to claim 25, further comprising: means for comparing a temporary record with entries in said database to determine any changes in activity status relating to a relevant wireless device; and means for overwriting an existing record with said temporary record if a change in activity status is determined (col. 8, lines 45-55).

Regarding claim 27, Berggren discloses the apparatus for providing a database of presence and location information regarding wireless system subscribers according to claim 26, wherein said means of copying and forwarding sends said copied registration notification message over a TCP/IP connection to said mobile activity status tracker (col. 8 lines 30-55, col. 10, line 42-col. 11, line 1).

Art Unit: 2681

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 4, 7, 9, 10, 16, 17, 22, 23 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berggren in view of Gossman et al (Gossman), U.S. Patent No. 6,181,935.

Regarding claims 3, 4, 9, 10, 16, 17, 22 and 23, Berggren discloses the mobile activity status tracker /method/apparatus of claims 1, 8, 14 and 20 as described above. Berggren, however fails to disclose the protocol for transferring information between the communication systems in claims 3, 4, 9, 10, 16, 17, 22 and 23 as being Signaling System #7 (SS7) and IS-41 compliant.

In a similar field of endeavor, Gossman discloses a system which enables seamless roaming for wireless subscribers with cooperation from various entities such as an HLR (col. 3, lines 30-53, col. 4, lines 1-12).

Gossman further discloses wherein communication between the various entities in the communication network utilize the SS7 protocol and is IS-41 compliant (col. 3, lines 62-67, col. 4, lines 17-22 and col. 11, lines 38-43).

Art Unit: 2681

At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify Berggren with the teachings of Gossman since such protocols are well known in the art to interconnect mobile controllers to transfer data (Gossman, col. 62-67).

Regarding claim 7, Berggren discloses the mobile activity status tracker of claim 6 as described above. Berggren, however, fails to disclose wherein the HLR is integrated with a message servicing center on a common platform.

Gossman discloses this limitation (col. 9, lines 55-65; figure 1).

At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify Berggren with the teachings of Gossman since it is known in the art to integrate multiple systems into one . Such integration requires only routine skill in the art.

Regarding claim 28, Berggren discloses the apparatus for providing a database of presence and location information regarding wireless system subscribers according to claim 26 as described above and further discloses said means for copying and forwarding sends said copied registration notification message over a TCP/IP connection to said mobile activity status tracker (col. 4, lines 46-56, col. 10, line 42-col. 11, line 1). Berggren, however, fails to disclose wherein said registration notification message is sent to said HLR using the SS7 protocol.

Gossman discloses wherein communication between various entities in the communication network utilize the SS7 protocol (col. 3, lines 62-67, col. 4, lines 17-22 and col. 11, lines 38-43).

Art Unit: 2681

At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify Berggren with the teachings of Gossman since the SS7 protocol is very well known in the art to interconnect mobile controllers to transfer data (Gossman, col. 62-67).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temica M. Davis whose telephone number is (703) 306-5837. The examiner can normally be reached on Monday-Thursday from 7:00 am to 4:00 pm. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Sinh Tran, can be reached on (703) 305-4040.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to TC2600 Customer Service whose telephone number is (703)306-0377.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9306 (for any communications intended for entry).

Application/Control Number: 09/576,022
